

HEAT TRANSFER FLUIDS

GlycoChill+ 'P' Series

Propylene Glycol-based heat transfer fluid with corrosion inhibitors to protect against corrosion of ferrous metals. Available in any dilution.

GlycoChill+ P200 FG

Propylene Glycol-based heat transfer fluid with corrosion inhibitors to protect against corrosion of ferrous metals. Suitable for use in applications where incidental contact with food is possible. NSF HT1 certified. Only available as concentrate.

GlycoChill+ 'P-HD' Series

Propylene Glycol-based heat transfer fluid with corrosion inhibitors to protect against corrosion of ferrous and nonferrous metals. Available in any dilution.

GlycoChill+ 'E' Series

Ethylene Glycol-based heat transfer fluid with corrosion inhibitors to protect against corrosion of ferrous and nonferrous metals. Available in any dilution.

Propylene Glycol

Virgin product for use with customer supplied corrosion inhibitor. Available in technical or food grade.

Ethylene Glycol

Virgin product for use with customer supplied corrosion inhibitor. Available in technical grade.

ALCOHOLS

Exo Endosol Series

Ethyl Alcohol-based heat transfer fluid with corrosion inhibitors to protect against corrosion of ferrous and nonferrous metals.

GeoChill+ 'M' Series

Methyl Alcohol-based heat transfer fluid with corrosion inhibitors to protect against corrosion of ferrous and nonferrous metals.

Methanol

Virgin product for use with customer-supplied corrosion inhibitor. Available in technical grade.

CLOSED LOOP CLEANERS & CORROSION INHIBITORS

GlycoClean C-70

Alkaline-based cleaner for use after new install and repair work.

GlycoHib I-50

Nitrite-based inhibitor for system with water or low glycol concentrate.

SERVICES

**Custom Dye / Dilution / Packaging
Fluid Specification Assistance
Project Submittal Packages
Free Annual Fluids Analysis*
Technical Support**

*for systems containing 500+ gallons of product, supplied by CORECHEM.
