

## PRODUCT DATA SHEET – Turpentine A

### PRODUCT #

---

150026

### PRODUCT DESCRIPTION

---

Turpentine A is a colorless to slightly yellow liquid with a characteristic pine odor. It has been steam distilled from gum rosin pitch.

### PACKAGING AND SHIPPING

---

Available in 55 Gal Drums

### CHEMICAL ANALYSIS

---

<i>Chemical Analysis</i>	<i>Typical Specification</i>
Specific Gravity (15.5 / 15.5 c)	.86 - .875
Refractive Index	1.465 – 1.478
Color (APHA)	10 Max
Residue after Polymerization	2.0 Max
Moisture %	.5 Max
Flash Point (Tag Closed Cup) F	105 F Typical
K.B. Value	63 Typical
Pounds per Gallon	7.2
VPC Analysis:	
Alpha Pinene	84.1%
Camphene	3.4%
Beta Pinene	3.3%
Delta 3 Carene	5.6%
Dipentene	1.9%
Beta Phellendrene	1.1%
Unknowns	0.6%

### APPLICATIONS

---

Turpentine A is used in adhesives, sealants, manufacture of paints, varnishes and similar coatings, printing ink and mastics, ink, perfumes and fragrances.
