

White Glove Delivery for Heat Transfer Fluids throughout the Eastern United States.

CORECHEM, Inc. is a full-service manufacturer of industrial heat transfer fluids for the HVAC, mechanical & geothermal markets where freeze protection is needed in water-based hydronic systems.

White glove delivery service includes no less than two fully trained CORECHEM employees on all bulk fills, as well as all necessary hoses, adapters, tools, and backup equipment. Our mission is to complete your fill to your satisfaction.

Our heat transfer fluid product line includes inhibited propylene and ethylene glycols, as well as inhibited ethanol and methanol-based products specifically for geothermal closed-loop systems.

GLYCOCHILL+[®]

GlycoChill+ E-Series, P-Series

Pre-Inhibited Ethylene or Propylene Glycol

- Available in concentrate or pre-mix solutions between 25%-100% in 5% increments
- Available as dyed or non-dyed in several different colors
- Available in short or full bulk tank truck loads. Also available in drums and totes.
- P-Series available in Food Grade

EXOENDOSOL[®]

EXOENDOSOL is a registered trademark of Greenfield Global USA Inc. and used under license.

Pre-Inhibited Ethanol-based Geothermal Fluid

- Available in concentrate, 50% and 25% solutions
- Pre-dyed blue to aid in leak detection
- Available in short or full bulk tank truck loads. Also available in drums and totes.
- Non-toxic

GE[®]CHILL+[®] M SERIES

Pre-Inhibited Methanol-based Geothermal Fluid

- Available in concentrate, 50% and 25% solutions
- Pre-dyed blue to aid in leak detection
- Available in short or full bulk tank truck loads. Also available in drums and totes.
